

FULLY THREADED HEXAGON HEAD SCREWS

METRIC THREAD (UNI 5739 - DIN 933)

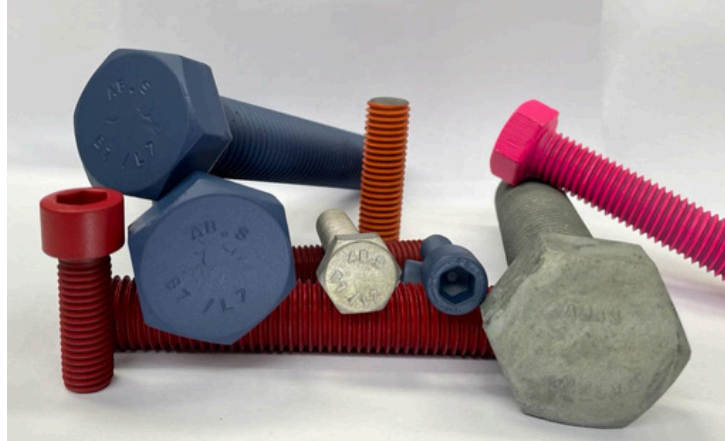

INCH THREAD (normal and heavy series ASME B18.2.1)

&

FULLY THREADED TCEI SCREWS

METRIC THREAD (UNI 5931 - DIN 912)

INCH THREAD (ASME B18.3)

Our company specialises in the supply of TE SCREWS and TCEI SCREWS in the following material grades, specifically for the OIL & GAS sector:

ASTM A193 GR.B7 - ASTM A320 GR.L7
ASTM A193 GR.B7M - ASTM A320 GR.L7M

and has stock from diameter M6 / 1/2" in the unfinished version.

We are able to offer the possibility of cutting the screws to length, should the required size not be available, starting from a longer length, and have any coatings requested by the customer, even with the reworking operations to adjust the threads in the case of thicker coatings.

This allows us to set up in a short time, [a very wide range of sizes and variants, especially for small and medium-sized lots.](#)

Of the same types, we can also produce the grades at short notice:

ASTM A193/A320 B8 and B8M (cl. 1 and cl. 2)
